PaneLock™ Security System

The PaneLock™ Security System works with our CTM? and PCM Series Mounts. It prevents removal of an LCD or Plasma from the mounting plate. The integrated theft-resistant clips latch the mounting bracket arms to the rod on the wall plate. A security screw then locks the pieces in place.
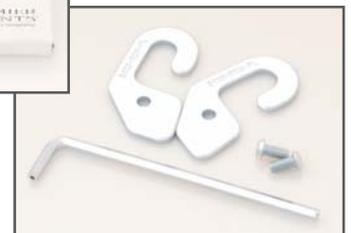

This revolutionary design features security screws that require a custom allen wrench (included) to attach and detach the hardware. Plus, it's backed by our industry-leading Lifetime Guarantee.

PaneLock™ secures mounting arms to wall plate
